The diagram illustrates a 12V electrical system for an aircraft engine. Key components and their connections are as follows:

- Headlights:** Two 10 CIR 90W headlights are connected to the main power line.
- Starter:** A 20 CIR RED fuse is connected to the starter motor.
- Alternator:** The alternator (A/C) is connected to the main power line via a 20 CIR BLU wire.
- Magneto:** The magneto is connected to the main power line via a 30 CIR RED wire.
- Relays and Fuses:** Various relays (e.g., 22 CIR BLU, 27 CIR RED, 27 CIR VEL-BLU) and fuses (e.g., 20 CIR RED, 20 CIR BLU) are used to control different parts of the system.
- Switches:** The system includes a master battery disconnect switch and several smaller switches for specific functions.
- Wiring Diagrams:** Four circular diagrams show the switch positions for different engine states: OFF (0+M+A1), RUN 1 (0+A1), RUN 2 (0+A1), and START (0+S+A1).
